

Angel Eye How-to Guide

1. Cut off glue on pegs

2. Lever off back ring

3. Cut slots so cable can come straight back instead of down

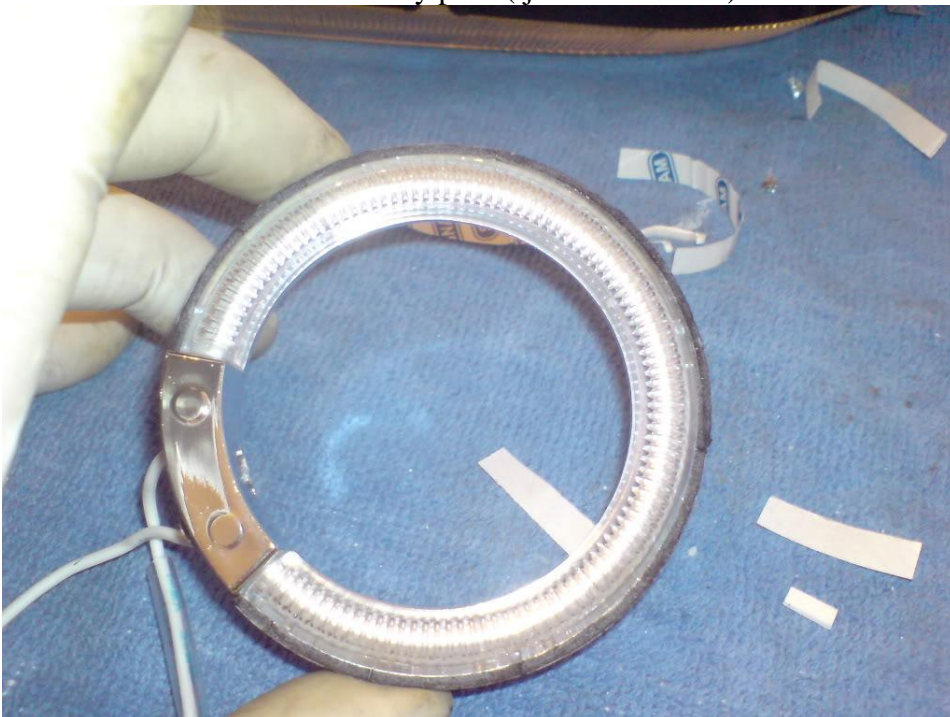

4. Back plate back on (no need to glue)

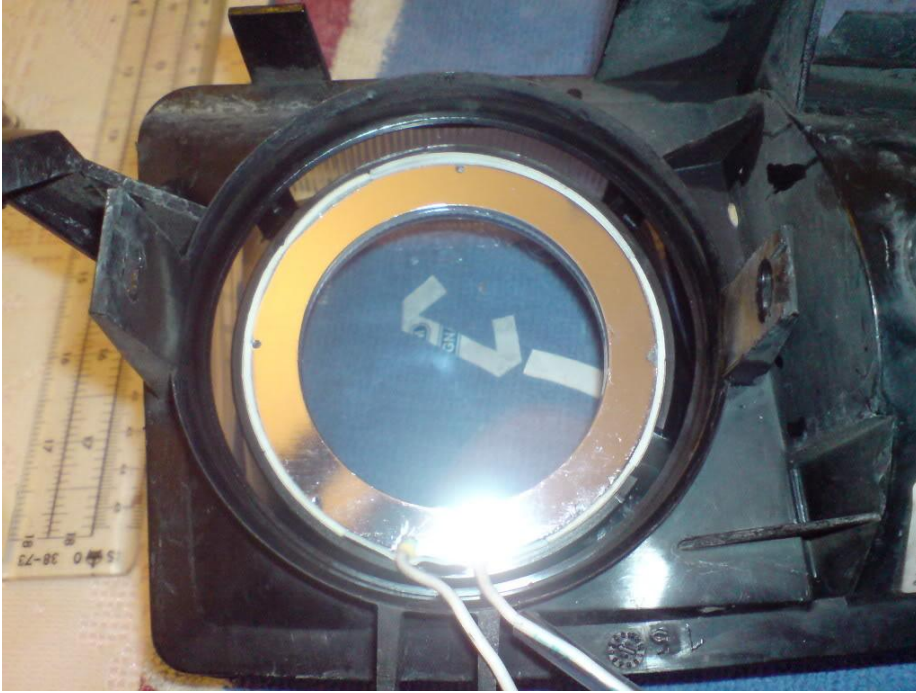

5. Sticky pads to help fix ring (only requires 3 to stick it)

6. Use black marker to colour sticky pads (just at the front)

7. Insert flush with inner ring

8. Check how they look (clean lens before inserting the rings)

9. Lights working
